LEGAL DISCLAIMER

The objects to be pursued by the company on its incorporation are:

Activities auxiliary to financial service activities n.e.c. Operating a digital platform facilitating the buying, selling, and trading of various cryptocurrencies, tokens, and digital assets. Providing a secure, efficient, and transparent marketplace for individuals and institutions to conduct cryptocurrency transactions. Offering technological solutions, software services, and infrastructure development tailored to enhance the efficiency and security of cryptocurrency exchange operations. Conducting research and development in blockchain technology, digital asset management, and other relevant areas to improve the services provided. Compliance with all regulatory requirements, laws, and guidelines pertaining to cryptocurrency exchange and financial services as mandated by the Companies Act 2013 and other applicable statutes.

Matters which are necessary for furtherance of the objects specified in clause :

1. To purchase, exchange or otherwise any movable or immovable property and any rights or privileges which the Company may deem necessary or convenient for the purpose of its main business.
2. To enter into a partnership or into any arrangement for sharing profits, union of interest, joint venture, reciprocal concession or co-operation with persons or companies carrying on or engaged in the main business or transaction of this Company.
3. To import, buy, exchange, alter, improve and manipulate in all kinds of plants, machinery, apparatus, tools and things necessary or convenient for carrying on the main business of the Company.
4. To vest any movable or immovable property, rights or interests required by or received or belonging to the Company in any person or company on behalf of or for the benefit of the Company and with or without any declared trust in favour of the Company.
5. To purchase, build, carry out, equip, maintain, alter, improve, develop, manage, work, control and superintend any plants, warehouse, sheds, offices, shops, stores, buildings, machinery, apparatus, labour lines, and houses, warehouses, and such other works and conveniences necessary for carrying on the main business of the Company.
6. To undertake or promote scientific research relating to the main business or class of business of the Company.
7. To takeover the whole or any part of the business, goodwill, trademarks properties and liabilities of any person or persons, firm, companies or undertakings either existing or new, engaged in or carrying on or proposing to carry on business this Company is authorised to carry on, possession of any property or rights suitable for the purpose of the Company and to pay for the same either in cash or in shares or partly in cash and partly in shares or otherwise.
8. To negotiate and enter into agreements and contracts with Indian and foreign individuals, companies, corporations and such other organizations for technical, or any other such assistance for carrying out all or any the main objects of the Company

Disclaimer: This certificate only evidences incorporation of the company on the basis of documents and declarations of the applicant(s). This certificate is neither a license nor permission to conduct business or solicit deposits or funds from public. Permission of sector regulator is necessary wherever required. Registration status and other details of the company can be verified on mca.gov.in

Cryptocurrency Bill and Tax in India

CRYPTOCURRENCY BILL IN INDIA

The Cryptocurrency Bill 2021, is a legislative initiative that was introduced in the Lok Sabha by the government to regulate the thriving market of cryptocurrency in India. The industry has seen a rush in investment in the last few years, especially during the covid period not just domestically but also internationally.

Crypto trading platforms like WazirX, CoinDCX, Zebpay, etc. in India are witnessing a big leap in volumes. An unregulated crypto market is unfavorable and risky even when the government wants to protect young entrepreneurs and investors. By introducing the Cryptocurrency Bill in 2021, the government officially took a step toward regulating cryptocurrency. The bill seeks to create a favorable structure for the creation of the official digital currency that will be issued by the Reserve Bank Of India (RBI). It also prohibits all other private cryptocurrencies but, with certain exceptions to boost the underlying technology of cryptocurrency. In the Union Budget of 2022, the government already took the step of imposing a 30% tax and 1% TDS on gains from virtual digital assets or cryptocurrencies.

CRYPTOCURRENCY TAX IN INDIA

Tax on cryptocurrency is one of the most confusing aspects in India. Initially, there was no Income Tax Act or Goods and Services Tax (GST) defined cryptocurrencies in India. In the recent Union Budget 2022 outcome, the Finance Minister presented a tax regime for virtual or digital assets that include cryptocurrencies.

- Cryptocurrency investors are required to report the calculated profits and losses as a part of their income.
- A 30% tax will be charged on the earnings from the transfer of digital assets that include cryptocurrencies, NFTs, etc.
- Just the cost of acquisition and no deduction will be permitted while reporting earnings from the transfer of virtual assets.
- A 1% deduction of tax deducted at source (TDS) on the buyer's payment if it crosses the threshold limit.
- If cryptocurrency is received as a gift or transferred it is subjected to tax at the giftee's end.
- If you face any loss from the virtual asset investment, it cannot be balanced against other income.

INTRODUCTION

The Only reliable place to invest and earn passive income and build a strong community.

Unambiguously, COINDEXIN Token is built to provide Safe, Secure, Centralized, and Quick transactions to the members of COINDEXIN Network. Moreover, it aims to grow and appreciate in value over time, providing gains for our members.

WHO OWNS COINDEXIN TOKEN LIFE STYLE?

Positive pleasure-oriented goals are much more powerful motivators than negative fear-based ones. Although each is successful separately, the right combination of both is the most powerful motivational force known to mankind. Focus is having the unwavering attention to complete what you set out to do. There are millions of distractions in every facet of our lives. Luxury lifestyle, wealth and abundance are the only things that everybody wants and aspires to achieve in today's life. Hence, COINDEXIN TOKEN, a product on Binance Smart Chain is developed to help people to achieve this goal.

COINDEXIN

OUR MISSION

- **To enable retailers to accept digital assets for luxurious goods and services.**
- **As well as gift packages and rewards.**
- **To make Blockchain technology and cryptocurrency accessible to the masses.**
- **To ensure users own personal data, which will significantly reduce the current data leaks via centralized financial systems.**
- **Operate as a community-focused and community-driven digital asset, fully centralized in every sense of the word.**
- **To create an ecosystem where different solutions can emerge from a social perspective, including collaborative applications.**

SECURE PLATFORM

THE MOST TRUSTED PLATFORM

A SECURE PLATFORM WHERE ALL YOUR ASSETS
ARE SECURED AND PROTECTED!

SECURE STORAGE

We store the vast majority of the digital assets in secure offline storage.

PROTECTED BY

SMART CONTRACT

All the coins are stored on our Multi-Coin wallets.

TRANSPARENT

We are a transparent platform where all your assets are secure and fully Centralized.

WHY TO INVEST IN THE COINDEXIN TOKEN?

BLOCKCHAIN INFRASTRUCTURE

Integrates blockchain technology to provide secure assets built on Binance

EASY TOKEN INTEGRATION

It provides perfect integration to all Wallets, Exchanges, DEXs, and DeFi in its entirety.

GLOBAL SYSTEM AND SECURE

An efficient global system covering all corners provides the best data security.

ECOSYSTEM

- The crypto ecosystem is a network of digital platforms and technologies that enable users to transact with crypto. It is based on blockchain technology. This technology creates a secure, centralized way to store and exchange digital assets.
- The blockchain protocol is an essential component of the crypto ecosystem. It comprises cryptography, P2P networks, and consensus mechanisms.
- Miners and stakers
- Every crypto ecosystem relies on one of two consensus mechanisms. The Proof of Work (PoW) mechanism has miners, while the Proof of Stake (PoS) model involves stakers.
- Proof of Work (PoW) is perhaps the most widely used mechanism to verify transactions on a blockchain and add new blocks to the chain. It is essentially a type of algorithm that does all of this by setting the rules for the work of mining. PoW thus plays a fundamental role in how blockchains work.
- POS was introduced as an alternative to the widely used Proof of Work (PoW) mechanism. PoW facilitates the validation of transactions on the network by getting participants to compete for the chance to do it. To motivate them to compete, they are given crypto rewards. The competition called mining involves solving complex mathematical problems using computational power. On the other hand, the validators of transactions on PoS engage in a process called staking. With staking, participants must stake or deposit crypto on smart contracts to establish credibility. When a stalker is chosen depends on the amount of crypto they stake as collateral.

ERC-20

ERC-20 is a Ethereum blockchain Ethereum Smart Chain token standard created with the intention of extending ERC-20, which is one of the most common Ethereum token standards out there.

ERC-20 is a blueprint as to how a token can be spent, who can spend it, and it even has rules about its overall usage. The ERC-20 standard was both derived from and fully compatible with the ERC-20 standard, and the code of the functions that define the ERC-20 standard are modifications of the ERC-20 standard.

These modifications were done and intended to improve the protocol while also optimizing its speed as well as transaction cost. In fact, ERC-20 was conceived as this technical specification for the Binance Smart Chain with the goal of actually providing a flexible format through which many developers can launch different tokens. These tokens could represent anything from shares within a business to dollars, which are stored in a bank vault such as stable coins.

COINDEXIN CRYPTO CURRENCY AND EXCHANGE

Bitcoin is a cryptocurrency, a digital asset that uses cryptography to control its creation and management rather than relying on central authorities.[1] Originally designed as a medium of exchange, Bitcoin is now primarily regarded as a store of value. The history of bitcoin started with its invention and implementation by Satoshi Nakamoto, who integrated many existing ideas from the cryptography community. Over the course of bitcoin's history, it has undergone rapid growth to become a significant store of value both on- and offline. From the mid-2010s, some businesses began accepting bitcoin in addition to traditional currencies 28/08/2025 ₹. 96,75,706

Blockchain technology gained public notice with the advent of bitcoin in 2009. Bitcoin is a cryptocurrency that runs on blockchain technology and is by far, the most popular and most ranked cryptocurrency. Ethereum was initially released in 2015. Within two years of its release, it was ranked the second best blockchain network, Bitcoin is the first. The Ethereum network acquired more global interest when china stated that it is the best blockchain network ever created.
